Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-7, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Haslam, II, et al US Patent 5,413,611.

Haslam, II et al discloses a socket liner (11) having a plurality of sensors (23, 16, 15, etc.). The sensors are pressure sensors and the grooves, pockets and strips have been interpreted as the grooves used to insert the sensors (see Figs. 1 and 2).

Claims 1, 8, 16 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Helmy US Patent 5,888,230.

Helmy discloses a socket liner (10, 20 and 34) having a plurality of sensors (38). The liner is made from two parts adhered together, a transmitter (42) and a receiver (44).

Allowable Subject Matter

Claims 10-15, 18 and 21-24 are allowed.

Response to Arguments

Applicant's arguments filed September 29, 2004 have been fully considered but they are not persuasive.

Regarding the new limitations entered in claim 1, have not been given patentable weight because the new limitations are function language. Expressions relating the apparatus to

Art Unit: 3738

contents thereof during an intended operation are of no significance in determining patentability of the apparatus claim. *Ex parte Thibault*, 164 USPQ 666, 667 (Bd. App. 1969).

Regarding the words “adapted to” and “configured to”, they have been held that the recitation that an element is “adapted to” or “configured to” perform a function that is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

Because of the above, the Examiner believes that the structure limitations claimed in the rejected claims read on the prior art.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
